

# 2019 86

## At a Glance

86 continues to celebrate what it means to be a thrill-seeking sports car. The core philosophy behind 86 has always been about having fun at minimal expense, just like the legendary AE86 for which it's named.

And just like that '80s autocross hero, 86 is rear-wheel drive, which helps it deliver amazing balance and a delightfully responsive ride – all without breaking the bank. It's hard to beat 86 when it comes to best bang for your buck and smiles for miles.

### Design

- \* LED Daytime Running Lights
- \* 17-inch twisted spoke alloy wheels[1]

### Safety

- \* Star Safety System™ – incorporates several standard braking technologies for enhanced driver and road safety
- \* 6 airbags[2]

### Performance

- \* 2.0-liter four-cylinder boxer engine – produces up to 205 horsepower and 156 lb.-ft. of torque
- \* 6-speed manual transmission offers a spirited drive

## New for 2019

86 TRD SE, available only in Raven exterior color, replaces the outgoing top-of-the-line 86 GT Black trim. Paired exclusively with a 6-speed manual transmission, 86 TRD SE includes beefier Brembo brakes for increased stopping power, SACHS performance dampers for enhanced stability, unique 18-inch split-spoke wheels[1] and tricolor side body graphics inspired by the 1980s TRD racing theme.

In addition to this new trim, 86 adds Neptune to its color palette for base and GT models.

## The Bottom Line

86 maintains the idea that compromises don't always need to be made. With brilliantly

balanced performance and a starting MSRP of only \$26,455[3], 86 brings out the true definition of what it means to be an affordable sports car. Top that off with Toyota’s excellent reputation for quality, durability and reliability – not to mention the ToyotaCare No Cost Maintenance Plan[4] and Roadside Assistance[5] – and it’s clear why 86 rewrites the book on practical performance.

## Key Features

### 86

Even in its most base trim, 86 brings its elemental driving experience to the table, aided by LED lights to promote better nighttime illumination and a leather-trimmed steering wheel that fits perfectly in the hands – at the prescribed nine and three positions, of course.

- LED high/low-beam headlights and turn signals embossed with “86” logo
- Auto-dimming rearview mirror with integrated backup camera[6] display
- Leather-trimmed tilt-telescoping steering wheel with silver contrast stitching

### 86 GT

86 GT gains track-worthy premium features inside and out, all with an emphasis on contributing to the driver experience. As the middle model in the lineup, 86 GT bridges the gap between 86 and 86 TRD SE, helping to deliver the best of both worlds.

- LED fog lights
- Smart Key System[7] with Push Button Start
- 4.2-in. TFT Multi-Information Display featuring a stopwatch lap timer, rpm readout, power curves and a G-force circle

## 86 TRD Special Edition

86 TRD Special Edition kicks it into high gear with a variety of performance-oriented add-ons. Upgraded brake, suspension and exhaust components make 86 TRD Special Edition even more fun to drive, all while staying true to its roots.

- 18-in. split-spoke alloy wheels[1]
- Brembo brakes and SACHS performance dampers
- TRD performance exhaust

1.
- 17-in. & 18-in. performance tires are often expected to experience greater tire wear than conventional tires. Tire life may be substantially less than mileage expectancy, depending on driving conditions.

2. All the airbag systems are Supplemental Restraint Systems. All airbags (if installed) are designed to inflate only under certain conditions and in certain types of severe collisions. To decrease the risk of injury from an inflating airbag, always wear seatbelts and sit upright in the middle of the seat as far back as possible. Do not put objects in front of an airbag or around the seatback. Do not use a rearward-facing child seat in any front passenger seat. See Owner's Manual for additional limitations and details.
3. MSRP excludes the Delivery, Processing and Handling Fee of \$920 for Cars (Yaris, Yaris iA, 86, Corolla, Corolla HB, Camry, Camry HV, Prius LB, Prius c, Prius Prime, Mirai, Avalon, Avalon HV), \$1,045 for Small/Medium Trucks, SUVs and Van (C-HR, RAV4, RAV4 HV, Highlander, Highlander HV, 4Runner, Sienna, Tacoma), \$1,295 for Large SUVs (Sequoia, Land Cruiser), and \$1,395 for Large Trucks (Tundra). (Historically, vehicle manufacturers and distributors have charged a separate fee for processing, handling and delivering vehicles to dealerships. Toyota's charge for these services is called the "Delivery, Processing and Handling Fee" and is based on the value of the processing, handling and delivery services Toyota provides as well as Toyota's overall pricing structure. Toyota may make a profit on the Delivery, Processing and Handling Fee.) Excludes taxes, license, title and available or regionally required equipment. The Delivery, Processing and Handling Fee in AL, AR, FL, GA, LA, MS, NC, OK, SC and TX will be higher. Actual dealer price will vary.
4. ToyotaCare plan covers normal factory scheduled service for 2 years or 25K miles, whichever comes first. See Toyota dealer for details and exclusions. Valid only in the continental U.S. and Alaska.
5. Roadside Assistance coverage is 2 years of unlimited mileage. Does not include parts and fluids, except emergency fuel delivery. See Toyota dealer for details and exclusions. Valid only in the continental U.S. & Alaska.
6. The backup camera does not provide a comprehensive view of the rear area of the vehicle. You should also look around outside your vehicle and use your mirrors to confirm rearward clearance. Environmental conditions may limit effectiveness and view may become obscured. See Owner's Manual for additional limitations and details.
7. The Smart Key System may interfere with some pacemakers or cardiac defibrillators. If you have one of these medical devices, please talk to your doctor to see if you should deactivate this system.
8. Aha Radio is a trademark of Harman International Industries Inc. Apps/services vary by phone carrier & are subject to change at any time without notice. Data charges may apply.
9. May not be compatible with all mobile phones, MP3/WMA players and like models.
10. Concentrating on the road should always be your first priority while driving. Do not use the hands-free phone system if it will distract you.
11. The *Bluetooth* word mark and logos are registered trademarks owned by *Bluetooth* SIG, Inc. and any use of such marks by Toyota is under license. A compatible *Bluetooth* enabled phone must first be paired. Phone performance depends on software, coverage & carrier.
12. HD Radio™ Technology manufactured under license from iBiquity Digital Corporation U.S. and Foreign Patents. HD Radio and the HD, HD Radio, and "Arc" logos are proprietary trademarks of iBiquity Digital Corp.
13. Vehicle Stability Control (VSC) is an electronic system designed to help the driver maintain vehicle control under adverse conditions. It is not a substitute for safe and attentive driving practices. Factors including speed, road conditions, weather and driver steering input can all affect whether VSC will be effective in preventing a loss of control. See Owner's Manual for additional limitations and details.
14. Brake Assist (BA) is designed to help the driver take full advantage of the benefits of ABS. It is not a substitute for safe driving practices. Braking effectiveness also depends on proper vehicle maintenance, tire and road conditions. See Owner's Manual for additional limitations and details.
15. Smart Stop Technology operates only in the event of certain contemporaneous brake and accelerator pedal applications. When engaged, the system will reduce power to help the brakes bring the vehicle to a stop. Factors including speed, road conditions and driver input can all impact stopping distance. Smart Stop Technology is not a substitute for safe and attentive driving and does not guarantee instant stopping. See Owner's Manual for details.
16. The Tire Pressure Monitor System alerts the driver when tire pressure is critically low. For optimal tire wear and performance, tire pressure should be checked regularly with a gauge; do not rely solely on the monitor system. See Owner's Manual for details.
17. Hill-Start Assist Control is designed to help minimize backward rolling on steep ascents. It is not a substitute for safe driving judgment and practices. Factors including speed, grade, surface conditions and driver input can all affect whether HAC will be effective in preventing a loss of control. See Owner's Manual for additional limitations and details.
18. The engine immobilizer is a state-of-the-art anti-theft system. When you insert your key into the ignition switch or bring a Smart Key fob into the vehicle, the key transmits an electronic code to the vehicle. The engine will only start if the code in the transponder chip inside the key/fob matches the code in the vehicle's immobilizer. Because the transponder chip is embedded in the key/fob, it can be costly to replace. If you lose a key or fob, your Toyota dealer can help. Alternatively, you can find a qualified independent locksmith to perform high-security key services by consulting your local Yellow Pages or by contacting [www.aloa.org](http://www.aloa.org).
